Albertan Government

EMERGENCY FIRST AID FORM

Minimum practical skills – 3.5 hrs (not including instructional theory time) Please read all information provided prior to submitting

Alberta Labour has adopted the Canadian Standards Association (CSA) Standard Z1210-17 First aid training for the workplace – Curriculum and quality management for training agencies, as well as additional, Alberta-specific training standards ("Alberta Plus"), into its first aid (FA) training approval process. The new process will be used for all FA training course approvals.

Agencies must only teach FA courses approved by the Director of Medical Services (DMS). The Occupational Health and Safety (OHS) Code, Part 11, section 177 outlines the requirements around workplace FA training and approval requirements.

It is recommended agencies use the Workplace First Aid Approval: Alberta Plus Quality Management Plan (QMP) bulletin to ensure all the required components are completed for a successful application. https://ohs-pubstore.labour.alberta.ca/FA017

The Alberta Plus QMP requires minimum workplace FA standards be met and reviewed. FA training agencies applying for workplace FA approval <u>must</u> comply with the Alberta Plus QMP process which includes:

- Submission of an approval application, (which can be found on the Alberta Labour website at https://www.alberta.ca/ohs-acceptances-approvals.aspx
- Prior to submission, <u>your medical advisor</u> must review your course(s) to verify that the course content meets CSA Standard Z1210-17.
- This FA form MUST be attached to the general approval application. The FA training agency will attach the FA form and all required supplemental information as directed.
- The competency levels indicated in the FA form are described below and must be met.

Competency Levels:

- **Awareness (A):** Upon successful completion of the workplace first aid training course, the workplace first aider will have information and will be able to access to other resources about this topic.
- **Knowledge (K):** Upon successful completion of the workplace FA training course, the workplace first aider will be able to recognize and recall knowledge related to this topic.
- **Skill (S):** Upon completion of the workplace FA training course, the workplace first aider will be able to apply a procedure or protocol, at the required competency level.

Have you forgotten anything? The FA form <u>MUST</u> be attached to the application. Complete the table below to ensure you have completed all the requirements.

Items to include	Agency – Completed (✓)	OHS ONLY (✓)
Part A: CSA Standards (applicable course level)		
Part B: Alberta Plus (materials)		
Part C: Quality Assurance (QA) documentation		

Submission of Completed Forms and Attachments: Agencies can send in their course application for approval either electronically by email: lbr.occhealth@gov.ab.ca or mail to: Dr. Xiangning Fan, Director of Medical Services, Specialized Professional Services, Alberta Labour, 8th Floor, 10808 – 99 Ave. Edmonton, AB T5K 0G5

FA017TMP-3 February 13, 2019 1 of 15

Part A Instructions:

The agency's <u>medical advisor</u> must review all mandatory CSA Standard Z1210-17 curriculum requirements and verify with a checkmark for each topic/competency on Part A of the FA form. If the medical advisor feels additional information is required, it can be added in the comments section.

2.1 Recognize warning signs Learning Requirements: Signs and symptoms – warning signs; pale, sweating, nausea, dizziness, unsteadiness Move casualty to a safe place, have him/her sit down 2.2 Manage fainting casualty Learning Requirements: Recovery position Loosen tight clothing around neck				

Part B Alberta Plus – Emergency First Aid Form Topic/Competency Competency Included		
3.0 Eye Injuries		
3.1 Recognize eye injuries	К	
Learning Requirements:		
 Learning Requirements: Signs and symptoms: red, watery or inflamed eye/s, pain, burning, impaired vision, 		
possible soft tissue damage around the eye and possible impaled object		
Mechanism of injury		
3.2 Recognize arc flash injuries to eyes	К	
<u>Learning Requirements:</u>		
Cause/Mechanism of injury: exposure to welding flash/torch		
Signs and symptoms: pain (mild to severe) usually starting a few hours after the		
incident, redness to eyes, photosensitivity, watery eyes, blurred vision, feeling of		
something in the eye(s) 3.3 Provide FA	S	
3.3 Flovide FA	3	
Learning Requirements:		
Examine to determine the extent and nature of injury		
• Assess the injured eye/s for equal gaze (eyes appear the same and move in the		
same direction) equal pupil shape and response, presence of a foreign body,		
fluid/blood draining from the eye, swollen or lacerated eyelids, bright red		
conjunctiva, etc.		
• <u>Arc flash</u> - protect the eyes from light; eye patches may be used; cool wet (saline		
solution) compresses for pain relief		
Do not delay care to remove contact lenses Transport the appropriate modified agree for further appropriate and transport		
 Transport the casualty to medical care for further assessment and treatment or call EMS for help (911) 		
Comments:		
connents.		
4.0 Chemical Burns to Eyes and Skin		
4.1 Signs and symptoms	K	
Learning Requirements:		
EYES		
Signs and symptoms: burning, pain, irritation, loss of vision, redness, swelling,		
visual damage to the eyes and skin on the face		
Consider potential for inhalation injury		
Casualty tells you the cause of the injury		
Learning Requirements:		
SKIN Signs and symptoms: pain blistoring skin is but to touch redness tingling visual		
 Signs and symptoms: pain, blistering, skin is hot to touch, redness, tingling, visual skin damage 		
Potentially delayed reaction to chemical exposure		

Agency Name:

Part B

Topic/Competency	Competency Level	Included
4.2 Provide FA by following instructions on SDS	S	
<u>Learning Requirements:</u>		
EYES		
Brush powdered chemicals off the face with a gloved hand or cloth and remove contaminated clothing		
Avoid contaminating yourself		
Immediately flush eyes with water/sterile saline, at least 15 minutes		
Take care to protect the uninjured eye and prevent irrigation fluid from running into it		
Do not delay care to remove contact lenses		
Provide ongoing casualty care		
 Send a copy of the SDS with the casualty to medical care (OHS Code, Part 29, Section 413) 		
• Transport the casualty to medical care for further assessment and treatment or call EMS for help (911)		
Complete FA record, including amount of time affected area was flushed		
First aiders can refer to SDS when needed		
SKIN		
<u>Learning requirements:</u>		
Brush powdered chemicals off with a gloved hand or cloth and remove contaminated clothing		
Avoid contaminating yourself		
Immediately flush eyes with water/sterile saline, at least 15 minutes, taking care to		
protect uninjured skin when possible		
Depending on the amount of exposure and the workplace, a shower may be present		
Provide ongoing casualty care		
Send a copy of safety data sheet (SDS) with the casualty to medical care (OHS Code,		
Part 29, Section 413)		
• Transport the casualty to medical care for further assessment and treatment or call EMS for help (911)		
Complete FA record including amount of time affected area was flushed
